PROFILE

A quick problem solver, skilled with HTML, CSS, AND JAVASCRIPT. Created many different websites using React JS.
Also a Machine Learning Enthusiast with skilled python programming. I am currently finding an internship for front-end development to enhance my skills.

EDUCATION

2019 - Present — **Air University/ Bachelors in Computer Science**
University, Islamabad
Currently doing a bachelor's in Computer Science degree. Studied Android Development, Web Development, and Artificial Intelligence. Also participated in multiple student clubs.

PROJECTS

2022 — **CANCEROUS CELL DETECTION WEB APPLICATION**
Air University
My university final year project, creating a web application that will perform detection, segmentation, and ranking of the colon nuclei cancerous cells. Convolutional Deep Learning would be used with a user-friendly interface. This is also my final year project.

2022 — **CAMOUFLAGED OBJECT DETECTION**
Air University
Detecting the camouflaged objects in the image using the PyTorch tool of deep learning.

2022 — **BLOGS WEBSITE**
Air University
Created a responsive website for posting blogs.

2021 — **GYM MANAGEMENT SYSTEM**
Air University
Created a webpage integrating it with the MySql database using PHP.
